SUMMARY

Front-End Developer with professional experience building responsive web applications and automating administrative workflows. Experienced in React, JavaScript, Firebase, Git-based development, and clean UI implementation. Currently developing internal business tools that streamline document generation, printing, and automated email notifications.

SKILLS

Front-End Development	HTML5, JavaScript (ES6+), CSS3, ReactJS, Responsive Design
Tools & Workflow	Git, GitHub, Debugging, Testing
Backend & Cloud	Firebase Authentication, Realtime Database, Cloud Messaging
Other Languages & Mobile	Flutter, Kotlin, Java, VB.Net

EXPERIENCE

TESDA — Davao del Norte Provincial Office | Davao del Norte, Philippines

Technical Support Staff / Web Application Developer | March 2026 – Present

- Developed and maintain a **React-based internal web application** that automates document generation and printing workflows, improving the speed and efficiency of administrative operations.
- Built automated workflows for generating standardized office documents and files, reducing repetitive manual tasks and improving document consistency.
- Implemented **automated email notifications** for Training Centers and Assessment Centers, streamlining communication and reducing manual notification processes.
- Translated business and administrative requirements into functional web application features in coordination with office personnel.
- Designed intuitive and responsive user interfaces focused on usability, efficiency, and ease of adoption by non-technical users.
- Provided technical support, troubleshooting, and continuous improvements for digital tools and systems used by the Provincial Office.

AIMHI | Tagum City, Davao del Norte

Front-End Developer Intern | April 2025 – July 2025

- Built responsive React components from Adobe XD designs.
- Collaborated using Git for version control and feature deployment.
- Tested and validated features prior to production release.
- Fixed UI issues to improve usability and consistency.

PROJECTS

TDIP — TESDA Davao del Norte Integrated Portal | Tech Stack: React

- Developed an internal web portal for the TESDA Davao del Norte Provincial Office to streamline document and file generation, printing workflows, and automated email notifications for Training Centers and Assessment Centers.

NotiFire (Capstone) | Tech Stack: ESP32, Firebase, Flutter

- Developed an IoT-based fire detection system connecting ESP32 to Firebase Realtime Database; implemented real-time push notifications via Firebase Cloud Messaging.

UMTC Research Title Portal | Tech Stack: PHP, MySQL (XAMPP), HTML, CSS

- Built a database-driven CRUD web application for managing university research titles; designed a responsive UI and implemented backend logic using PHP and MySQL.

eType | Tech Stack: Kotlin

- Developed an Android typing game calculating real-time Words Per Minute (WPM); implemented scoring and input validation logic and designed an interactive performance-tracking UI.

EDUCATION

University of Mindanao Tagum Campus | Bachelor of Science in Information Technology

2021 – 2025
